

## Youssef Obeid, DDS, FACP

Dr. Obeid is a Board-Certified Prosthodontist, practicing in Chevy Chase, MD. After graduating from dental school in 1993, he spent the next years completing an Advanced Education residency in General Dentistry at the University of Maryland School of Dentistry. He continued his training at UMAB with a Prosthodontic residency and an Advanced Surgical Implant fellowship at NYU. Dr. Obeid established Obeid Dental as a unique clinical setting where patients can receive world-class dentistry in a refined, boutique environment, 'One Patient at a Time'. In addition to over 20 years of experience, Dr. Obeid is credentialed as a Diplomate of the American College of Prosthodontics and served as President of the ACP Maryland chapter. He has lectured nationally and internationally on the latest advances in implants, prosthodontics, and digital workflow for dental practices. He has been a Clinical Assistant Professor at the University of Maryland School of Dentistry since 2001.

## Roseanna Morgan, CDA

Roseanna Morgan is a CDC Compliance Investigator for the Maryland State Board of Dental Examiners, working to address complaints submission. Her documentation of violations and lapses in infection control protocols are key factors in Board decisions and she has served as an expert witness for Board proceedings. Ms. Morgan is the former Clinical Coordinator for Post Graduate Prosthodontics at the University of Maryland School of Dentistry. She is a former Adjunct Faculty Instructor for the Chesapeake College Allied Health Dental Assistant Program.

## Are You Compliant?

### Avoiding OSHA Disciplinary Action and Malpractice

#### Course Outline

Dental providers and offices must uphold a high standard of safety and infection control protocols. CDC guidelines and OSHA regulations have been created to ensure the safety of patients and staff. Failing to comply with these standards can have dire consequences. Disciplinary actions for violations can range from reprimands to suspension or revocation of licensure. Malpractice proceedings can also stem from these violations. This lecture will focus on how to assess your compliance readiness and best practices for implementation and maintenance of compliance protocols to avoid disciplinary and legal action.

## Learning Objectives

- Understand the rationale of OSHA and CDC regulations and enforcement.
- Assess office readiness for OSHA inspections.
- Develop site Infection Control Manual to document compliance
- Implement accountability procedures for maintenance of logs, filings, training etc.
- Understand the potential legal impact of noncompliance

## In Conclusion

At the conclusion of this lecture, attendees should be able to:

- Understand the role of OSHA and CDC regulations and the consequences of non-compliance
- Accurately assess office protocols for adherence to regulations and implement necessary updates
- Create and maintain practice Infection Control Manual outlining all infection control and safety protocols
- Create and maintain documentation of training efforts for New Hire and Annual Training on infection control, safety procedures, licensure documents
- Understand and identify compliance lapses that could result in disciplinary actions or contribute to malpractice proceedings.
