

Dr. Youssef Obeid

Dr. Obeid is a Board-Certified Prosthodontist, practicing in Chevy Chase, MD. After graduating from dental school in 1993, he spent the next years completing an Advanced Education residency in General Dentistry at the University of Maryland School of Dentistry. He continued his training at UMSOD with a Prosthodontic residency and an Advanced Surgical Implant fellowship at NYU. Dr. Obeid established Obeid Dental as a unique clinical setting where patients can receive world-class dentistry in a refined, boutique environment, 'One Patient at a Time'. In addition to over 20 years of experience, Dr. Obeid is credentialed as a Diplomate of the American College of Prosthodontics and served as President of the ACP Maryland chapter. He has lectured nationally and internationally on the latest advances in implants, prosthodontics, and digital workflow for dental practices. He has been a Clinical Assistant Professor at the University of Maryland School of Dentistry since 2001.

Different Bone, Different Implants

Course Outline

This lecture is designed to help providers choose the right implant based on the anatomy of the remaining bone. We will cover different implant styles, designs, surface roughness, and shapes. A 'one size fits all' approach is a recipe for failure. We will discuss common challenges with available bone and the optimal implant for these areas.

Learning Objectives

In this lecture we will discuss:

1. How implant design influences the procedure
2. Bone level vs tissue level implants
3. The history and success of Mini Implants
4. What are Zirconia Implants
5. The new Wedge Implants

In Conclusion

At the conclusion of the lecture participants should be able to:

1. Decide when to graft and when to use other implant alternatives
2. Know the indications for Zirconia implants
3. Understand the limitations of mini implants
4. Understand the surgical principle of Rex Wedge Implants
